The Film Education scheme - Targeted projects

The aim of the funding line is to bring film to a young audience, usually not over 19 years old (exceptions are possible). Swiss organisations should be strengthened through European knowledge exchange and networking cooperations. The networking support comes with two different options. It's possible to either

- a) dock to a Creative Europe MEDIA co-financed network or to
- b) create a new international network with at least 2 partners from 2 different MEDIA countries. The offered programs must be available in at least three European languages, including at least one national language of Switzerland (German, French, Italian).

In terms of content, there are three options:

- Film education activities that use **innovative or digital tools**. This option targets an audience not over 19 years old.
- The preparation of a film catalogue of existing predominantly European films for use in **out-of-school** film education.
- The exchange of knowledge regarding material or methods of film education with the aim of exploiting synergies.

Only the Swiss part of the network is funded.

The production of films or the organisation of film festivals cannot be funded.

The application can be made for a single year or for multi-year-actions — up to a maximum of three years. If the application is made for more than one year, it must show an overarching theme in the case of actions which basically repeat the same structure every year.

Assessment

Please answer in the language of the application (German, French or Italian), if possible. However, if these are not your mother tongue, **you may also write in English**.

Experts are expected to give comments on each award criterion and, in their comments, **refer explicitly to the elements of analysis under the relevant criterion**. The comments on each award criterion have to reflect and justify the score given for it.

As **horizontal priorities**, we ask you to take into account the strategies to ensure a **more sustainable industry** and diversity, either in the project/content or in the way of managing the activities (if applicable).

At the end of the assessment, give us 5 to 7 positive and / or negative comments on the application as a whole, highlighting its relative strengths and weaknesses.

Evaluation summary / Reasons for recommendation

Please give us five to seven positive and/or negative arguments which support the selection or rejection. These arguments should be in a form that can be given to the applicants as a justification of the decision. In a rejection obviously the negative arguments should prevail, but you may (and should) as well give positive aspects.

As an indication, would you recommend the rejection or the selection of the project? (please note that projects must reach the threshold of minimum 70 point out of 100 to be supported)

| Recommendation for selection | |
|------------------------------|--|
| Recommendation for rejection | |

For multi-year projects only: If you recommend the selection, is it for the whole multi-year project, or for a shorter period of time (e.g. single edition/year))?

| Recommendation for selection for the whole multi-year project | |
|---|--|

| Recommendation for selection for a shorter period of time (please specify) | |
|---|--|
| If you recommend the selection: | |
| Amount of support recommended by the expert | |
| The support recommended by the expert cannot be higher than the support requested | |
| by the applicant company. A reduced amount must be justified, for example on the | |
| basis of the budget (please indicate which items you consider overestimated). | |

Scores

Within the maximum number of points per award criterion, ranges of scores are defined that correspond to a fixed definition of the expected quality standard so that an as coherent approach as possible is implemented, across experts as well as across actions. The standards on a **10 points scale** are as follows:

- 9-10 Very good the application addresses all relevant aspects of the criterion in question convincingly and successfully. The answer provides all the information and evidence needed and there are no concerns or areas of weakness.
- 7-8 Good the application addresses the criterion well, although some small improvements could be made. The answer gives clear information on all or nearly all of the evidence needed.
- 5-6 Acceptable the application broadly addresses the criterion, but there are some weaknesses. The answer gives some relevant information, but there are areas where detail is lacking or the information is unclear.
- 3-4 Fair the application addresses the criterion, but there are many weaknesses. The answer gives some relevant information, but there are several areas where detail is lacking or the information is unclear.
- 1-2 Very weak the application fails to address the criterion or cannot be judged due to missing or incomplete information. The answer does not address the question asked, or gives very little relevant information.
- 0 No evidence the application fails to include a minimum amount of evidence to enable the criterion to be evaluated. Although indicated on the scoring scale, experts should avoid "0" which relates to "no evidence". For obvious particular case, experts should contact MEDIA Desk Suisse.

N.B. Some criteria are to be rated on a **scale of 15 points or 25 points.** In those cases, you may find useful to use the standard scale and then multiply the score by the corresponding factor, further refine to the next whole number (if applicable). For example: 8/10 points in the standard scale corresponds to 12/15 (factor: x1.5) or 20/25 (factor: x2.5).
